

CAREER OBJECTIVE

Software Engineer with hands-on experience in **Java, backend systems, and full-stack development**. Backed by an industry backend project and multiple **full-stack/ML builds**. Looking to apply strong **data structures, algorithms, and system design** fundamentals to build reliable software on a collaborative engineering team.

EDUCATION

•Anna University(MIT), Chennai	2023 – Present
Bachelor of Technology in Artificial Intelligence and Data Science	CGPA: 8.39 (as of Semester 5)
•AKT Academy MHSS	2023
Higher Secondary Examination (12th)	Percentage: 96.66%

EXPERIENCE

•Enterprise Ticketing & ITSM Platform	May 2026 – Present
Backend Developer (Student Consultancy Project)	Chennai, India
– Built a multi-module IT Service Management (ITSM) system with an agile team of 6 engineers, following Domain-Driven Design principles to keep modules independently deployable.	
– Built a configurable workflow automation engine in ASP.NET Core that lets support teams change routing rules without a code deploy.	
– Designed PostgreSQL schemas for support queues, agent permissions, and SLA tracking, keeping the data model normalized across regions and agent tiers.	
– Reviewed module designs against Functional Specification Documents (FSD) and demoed features to customer stakeholders, catching design issues before implementation.	

PERSONAL PROJECTS

•Tekhora '26	React.js, Node.js, Firebase, Cashfree
Frontend Lead	
– Platform Engineering: Engineered symposium platform with dynamic routing and QR check-ins, handling 2,500+ visitors with zero check-in failures.	
•Real-Time Assistant for Visually Impaired	PyTorch, YOLOv8, MiDaS, OpenCV
Deep Learning Developer	
– Pipeline Architecture: Built low-latency spatial awareness pipeline on edge hardware using YOLOv8n for detection and MiDaS for depth estimation.	
– Optimization & Features: Implemented temporal smoothing and cooldown logic to eliminate false audio alerts, integrating BLIP scene captioning and gTTS.	
•Zylora – AI E-Commerce Platform	Node.js, Express, MongoDB, LLMs
Full-Stack Developer	
– Personalization Engine: Designed vector search engine ranking products via cosine similarity over user interest centroids, backed by nightly cron jobs.	
– NLP & AI Assistance: Built an NLP search pipeline with Porter Stemming and integrated Llama 3.3 and Gemini models as AI shopping assistants.	

TECHNICAL SKILLS AND INTERESTS

Programming Languages: Java, C++, C#, C, Python (Data Science), JavaScript
Core Areas: Object-Oriented Programming (OOP), Data Structures & Algorithms, Machine Learning, Computer Vision, Data Science, OS, DBMS
Web Technologies: React.js, Node.js, HTML, CSS, ASP.NET Core, Tailwind CSS, Express.js, JDBC
Databases: SQL (Oracle), PostgreSQL, MongoDB
Tools & Platforms: Git, GitHub, VS Code, Postman, Swagger
Soft Skills: Critical Thinking, Team Work, Adaptability, Leadership, Communication
Interests & Languages: Fitness & Strength Training • Tamil, English (Fluent)

CERTIFICATIONS

NPTEL Programming in Java • Machine Learning • Full Stack Development Workshop • JavaScript Programming • Node.js • React.js Advanced

ACHIEVEMENTS

•Symposium Organizer– Managed timelines and logistics for Tekhora '26	2026
•NPTEL Programming in Java– Certified Elite Scorer	2025
•Runner-up in Detective SQL– MIT Tech Symposium	2024
